- East to operate controls
- High Pressure (5,000 PSI) Units
- "VF" Series are Twin Hinge
- Additional innovative features

Expansion Side
(Guards Removed for Photo)

Large Feed Openings
(Shown with Optional Shark System)

International Baler Corporation introduces the next generation in baling equipment and design, the Expansion Side Series of Balers. Units are available as both 3,000 PSI and 5,000 PSI systems. This innovative design allows for pre-compression of material to eliminate the need for re-conditioning most materials. And with the option of our exclusive "Shark System", shearing pressure of bulky material is reduced.

With all of the standard features and our optional "Shark System", this truly is the baler to take a "BITE" out of your baling needs.

SPECIFICATIONS

	Bale Size	Main Motor	Oil Reservoir (gallons)	Main Cylinder Bore	Total Force (lbs)	Ram Face Pressure (PSI)	Cycle Time (no load) in seconds	Dimensions (L x W x H)	Shipping Weight (lbs)
